

DANIELLE JAMES

Application Development

Full Stack Engineer

PROFILE

Full stack web developer with backend experience, educated at Rice Extension. Skills in MERN stack technologies, including MySQL, Java, and PWA. Ambitious and passionate about producing responsive, progressive web applications utilizing my newly acquired skillset. Seeking to leverage background and experience to take my career as a full stack developer to senior level with a highly respected organization focused on creating strong solution sets and ground-breaking processes.
